# Problem solving

## What is problem ?

- Anything that deviates from standards & target.
- Something that is difficult to deal with.

# Problem solving steps:

Step 1 : Clarify the problem

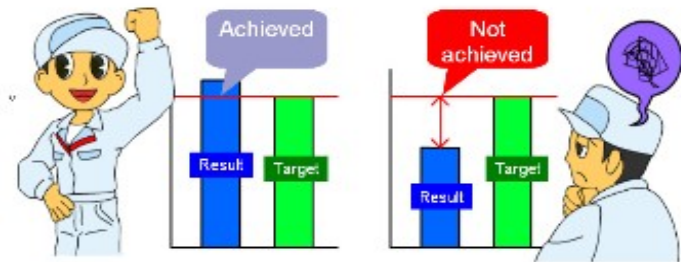

Step 2 : Break down the problem

Step 3 : Target setting

Step 4 : Determining the root cause

Step 5 : Develop counter measures

Step 6 : Confirm results & processes

*Large* enough to Deliver, *Small* enough to Care
